

MaanakAI (■■■■ AI) — Video Presentation Script

Smart India Hackathon 2024 · Problem Statement ID: SIH 26108 (PS-108)

Format: 2-Presenter Standout Interactive Script | Duration: ~4 Minutes | Focus: Real-World Pipeline Case Study

ACT 1: THE REAL-WORLD HOOK (0:00 – 1:00)

■ VISUAL CUE / WHAT TO SHOW ON SCREEN: <i>Split-screen showing camera on both presenters. Display newspaper clipping / graphics: '₹800 Crore Pipeline Project Stayed by Court'. Zoom into tender clause with red warning stamp: 'Outdated Standard Cited Missing Mandatory QCO Mark'.</i>	
Person A	"In 2023, high-priority drinking water tenders worth over ₹800 Crore under the Jal Jeevan Mission were abruptly stayed by the High Court."
Person B	"And the craziest part? It wasn't because of corruption or budget issues. The entire project collapsed because of a fatal flaw inside the tender specification document itself ."
Person A	"The engineers accidentally cited an outdated standard for pipes and missed a newly notified Mandatory Quality Control Order (QCO) from the Central Government. Rival manufacturers sued, the project was frozen, and 4 million rural citizens were left without tap water for over a year."
Person B	"In India's ₹10 Lakh Crore public procurement ecosystem, government officers are forced to track over 22,000 active Indian Standards by hand. It is humanly impossible to keep up. That's why we engineered MaanakAI ."

ACT 2: WHAT IS MAANAKAI & LIVE SEARCH DEMO (1:00 – 2:00)

■ VISUAL CUE / WHAT TO SHOW ON SCREEN: <i>Switch to the Live MaanakAI Web Application (120% browser zoom). Person B types in search bar: 'Supply of 1200 meters Ductile Iron Class K7 pipes DN 200mm'. Result card pops up instantaneously with IS 8329 and bright red MANDATORY QCO badge.</i>	
Person A	"MaanakAI is an autonomous Indian Standards recommendation and compliance engine for public procurement. Unlike ChatGPT, which invents fake standard numbers, MaanakAI is directly grounded in official Bureau of Indian Standards (BIS) gazettes with zero hallucination."
Person B	"Let's prove it right now. I'm entering the exact requirement that crashed that ₹800 Crore tender: 'Supply of 1200 meters Ductile Iron Class K7 pipes'. Watch the screen—in just 20 milliseconds , MaanakAI identifies the engineering parameters and recommends IS 8329 ."
Person A	"And look right here at the compliance badge! It immediately alerts the officer that compliance is MANDATORY under Central Government QCO regulations, requiring bidders to hold a valid BIS license with a CM/L number. It even pulls in allied testing standards under IS 12288!"

ACT 3: TENDER PDF AUDITOR & INSTANT 5-POINT CLAUSE (2:00 – 3:00)

■ VISUAL CUE / WHAT TO SHOW ON SCREEN:

Navigate to **Tender Health Auditor**. Drag and drop *tender.pdf*. OCR scans the *Bill of Quantities* table. Item 3 shows a red warning badge for an obsolete 1985 standard and a brand-name flag. Click '**Generate 5-Point Specification Clause**' to reveal the formatted GeM clause.

- Person B** "Now, what if an officer already has an existing 50-page tender document? We simply drag and drop the PDF into our **Tender Health Auditor**."
- Person A** "Our integrated OCR scans the *Bill of Quantities* tables in seconds. Look at these audit findings: It catches an **obsolete 1985 standard** and warns against restrictive brand names, guaranteeing full compliance with **Rule 144 of the General Financial Rules (GFR 2017)**."
- Person B** "And with one click on **Generate Clause**—MaanakAI synthesizes an authoritative **5-point GeM specification clause**, complete with governing standards, acceptance testing, and packaging instructions, ready to publish immediately."

ACT 4: DEEP TECH, BENCHMARKS & GRAND FINALE (3:00 – 4:00)

■ VISUAL CUE / WHAT TO SHOW ON SCREEN:

Quick demo of typing Hindi trade slang: ■■■■■■ Fe-500 mapping to **IS 1786 TMT Bars**. Display metric scorecard: **10,000 Tenders Evaluated | 98.4% Accuracy | < 35ms Latency**. Final slide: Team names, GitHub QR code, and tagline: MaanakAI: Empowering Atmanirbhar Bharat.

- Person A** "MaanakAI is built for India's real-world diversity. It understands colloquial trade terms across Indian languages—automatically mapping terms like '*Sariya Fe-500*' in Hindi to formal BIS steel standards (**IS 1786**)."
- Person B** "And it is battle-tested. We validated MaanakAI across a benchmark of **10,000 real procurement test cases** with **98.4% accuracy** and an average latency under 35 milliseconds. Best of all, it runs 100% air-gapped on standard office computers without internet."
- Person A** "MaanakAI turns a **3-day manual research nightmare** into a **30-second workflow**—preventing court stays and ensuring quality public infrastructure for India."
- Both (Together)** "Thank you! We look forward to your questions."

■ 5 PRO-TIPS FOR VIDEO RECORDING SUCCESS:

1. **Screen Resolution:** Set browser zoom to 120% so text and badges are crystal clear on 1080p.
2. **Chemistry:** Maintain eye contact with the camera when speaking, and look at the screen when your partner is demonstrating.
3. **Microphone:** Use a lapel mic or crisp headset in a quiet room with minimal echo.
4. **Timing:** Keep each turn between 15 and 25 seconds for snappy, engaging delivery.
5. **Keywords:** Verbally stress '*GFR 2017 Rule 144*', '*Mandatory QCO*', and '*Sub-35ms*'.
